PHP

How do I disable the PHP error reporting?

This is quite easy, just add this to your PHP file:

```
error_reporting("E_ALL") ;
```

you can also achieve this via **.htaccess** if AllowOverride is set correctly:

```
php_flag display_errors off
```

If you would like the errors to be logged to a file though, you can also do that:

```
php_flag log_errors On
php_value error_log /var/log/apache2/site.errors.log
```
