Linux

How do I fix "4gb seg fixup, process xxx" running XEN on Debian (Etch)?

Hi Folks,

well it has happend too me and the fix for that is really easy, I installed XEN and suddenly it just appeared, everything was working thought. So, as you install xen on Debian Etch it does not automatically fix up your libc6, so what you should do is just:

- apt-get install libc6-xen

After that has been done, the messages should stop.
enjoy ...
