MySQL

How do I install MySQL 4.1 on Debian Etch / Debian 4.0?

Hi Folks,

I ran into that problem and here is a quite easy solution, thanks to www.mytso.net:

- edit /etc/apt/sources.list
  add the following line:
  deb http://debian.mytso.net/etch /
- edit /etc/apt/preferences
  add the following lines:

  Package: mysql-server-4.1
  Pin: version 4.1.11b-etch*
  Pin-Priority: 1001
- aptitude update
- aptitude install mysql-server-4.1 mysql-client-4.1 mysql-common-4.1 libmysqlclient14

That´s it, enjoy!
