qmail

How do I delete the qmail queue?

that is pretty simple too, but remember: ALL emails will be deleted and gone forever:

- /etc/init.d/qmail stop (or qmailctl stop)
- cd /var/qmail/queue (be sure that you have changed into that subfolder!!!)

- find -type f -exec rm -f '{}' \;
- touch /var/qmail/queue/lock/sendmutex
- chown qmails:qmail /var/qmail/queue/lock/sendmutex
- /etc/init.d/qmail start (or qmailctl start)

that should do it and your queue should be empty, you can check via:

- /etc/init.d/qmail stat (qmailctl stat)
