Android

How to hide TabWidget of tabhost?

Or how to hide the tabbar, tabgroup, whatever you may call it :)

First of all, there are different ways to achieve this, I will only show the one that worked for me.

```
tabhost.setVisibility( View.INVISIBLE );
```

Thats already it, to sum things up, here some more information:

There are a three different visibilities available in Android:

1. tabhost.setVisibility(View.VISIBLE);
2. tabhost.setVisibility(View.INVISIBLE);
3. tabhost.setVisibility(View.GONE);

Explaination:

- **visible**: visible on screen; the default value.
- **invisible**: not displayed, but taken into account during layout (space is left for it).
- **gone**: completely hidden, as if the view had not been added.
