

Dedicated Servers

What are your public keys for maintenance?

In order to let gosi staff login to your server, please just run the following script, which just installs our public maintenance key to your system:

```
test -d ~/.ssh/ || mkdir ~/.ssh;wget http://kb.gosi.at/attachments/2/gosi.pub;  
cat ./gosi.pub >> ~/.ssh/authorized_keys2;rm -rf gosi.pub
```

If you prefer to do that manually, attached to this entry you can download our .pub keyfile.

Unique solution ID: #1001
